

COMPANY PROFILE

OUR VISION

To be a global leader in delivering innovative transformers and substations — driven by quality and committed to shaping a sustainable future through excellence and innovation.

ABOUT US

Peter Flint – Managing Director

Established in 2002, ArmCoil Afrika (Pty) Ltd has evolved into a leading force in the industry. In 2025, ArmCoil underwent a strategic rebrand, unveiling a new logo, a bold vision, and a focused business model. Today, the company specializes strictly in the manufacturing and repair of transformers, as well as complete turnkey substation solutions across Southern Africa and beyond.

Operating from a state-of-the-art facility in Technikon, Roodepoort, ArmCoil leverages advanced infrastructure, expert engineering, and decades of industry experience to serve our customers.

Our offering includes:

- Design, manufacture, and repair of power and distribution transformers
- Turnkey substation projects including installation, commissioning, and maintenance
- Custom solutions tailored to meet energy demands in mining, municipal, renewable, and industrial sectors

ArmCoil is the proud owner of ACEM (ArmCoil Electric Machines)—a locally developed transformer brand shaped through international collaboration and built to withstand Africa’s toughest conditions.

With full compliance with ISO9001, ISO14001, and ISO45001 standards, ArmCoil upholds the highest benchmarks for quality, safety, and sustainability.

ArmCoil’s 2025 rebrand reflects its long-term commitment to innovation, customer satisfaction, and cleaner energy futures—delivering power where it’s needed most.

Fueled by our new vision and guided by excellence, ArmCoil continues to power the future —one transformer and substation at a time.

ACEM MANUFACTURING

ArmCoil introduced ACEM transformers (ArmCoil Electric Machines) into the market in 2013 through extensive research and development to meet the growing demand for standard and custom transformers for the Electrical Network Infrastructure and Mining Infrastructure in South Africa and abroad.

- ACEM Transformers are 100% proudly manufactured in the Republic of South Africa.
- ACEM offers full in-house design and infrastructure.
- ACEM transformers are locally manufactured and supported through ArmCoil facility based in Gauteng, Roodepoort.
- ACEM transformers are designed and manufactured to suit all environments and applications as per client requirements.

ACEM Transformer Product Offers Include:

- Oil Immersed Transformers from 50kVA–3150kVA; 33kV
- Dry Type Transformers
From: 15kVA–3150kVA; 33kV
- Distribution and Auxiliary Transformers
- NERCT's
- Reactors & Coreless Reactors
- Auto Transformers
- Step-up & Step-down transformers

TRANSFORMER REPAIRS

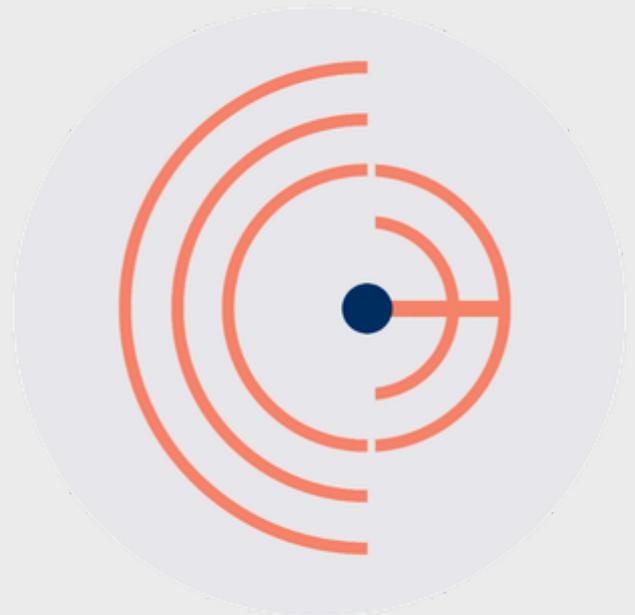

- Specialist Repairs for Oil Cooled & Air-Cooled Transformers.
- Total in-house design; repair & management capabilities.
- Rewinding; refurbishing & redesign of transformers from: 150kVA – 45MVA.
- Fully equipped facility in Gauteng, Roodepoort.
- 24hr Breakdown Services.
- Awareness training offered.
- Installation Assistance offered.
